

Pure Rain™

STORMWATER TREATMENT

FILTRATION BAGS

Pure Rain™ Filtration **BAGS** are designed for reducing turbidity, TSS, metals and other pollutants and are an excellent way to treat throughout a site. Filtration Bags can be used for sheet flow, in vaults, catch basins, ditches or swales.

Filtration Bags utilize a malleable material that bends and contours to any surface. They have a high UV resistance and are designed to have a long life. Choose either Biochar**BASIC**™ or Biochar**PEAT**™ Stormwater Filter Media to meet your site's individual needs.

Pure Rain™ Filtration **BAGS** Options:

- High UV resistant material
- Easy Deployment
- Easy Maintenance
- Standard Length is roughly 36" Long
- Choice of media, Biochar**BASIC**™ or Biochar**PEAT**™
